

KRUTIKA KAUR

Caledon ON • +1 647 922 0221 • kkrutika674@gmail.com

Education

McMaster University — Bachelor of Engineering (B.Eng)

Expected: April 2029

Engineering I

- Relevant Coursework: Integrated Cornerstone Design Projects in Engineering, Calculus 1, Mechanics, Linear Algebra

Experience and Extracurricular

McMaster University

Oct. 2025- Dec. 2025

Robotic End-Effector System (Engineering Project)

- Designed and prototyped a lightweight robotic end effector capable of gripping irregular and fragile objects.
- Built detailed CAD models and contributed to mechanical optimization that reduced component weight by 15%
- Created CAD models and contributed to iterative mechanical redesigns to improve grip and enhance reliability.
- Developed authentication and order-processing functions using Python (bcrypt, CSV handling) and helped program Q-Arm pickup and placement sequences.
- Coordinated team workflow by managing schedules, creating Gantt charts, and organizing weekly planning sessions.

ABC Access Business College

Jun. 2025- Aug. 2025

Administrative Intern

- Built a Python program to track student enrollment, automating data extraction and generating summary CSV reports that cut administrative processing time by 50%.
- Cleaned and validated student information using Python functions to detect duplicates, missing fields, and formatting issues, improving data accuracy by ~35%.
- Worked with the CRM system to enter data, correct errors, and maintain accurate, up-to-date student records.
- Updated student documents and supported daily administrative tasks while developing practical skills in data management and automation.

Mayfield Secondary School

Oct. 2024- Jun. 2025

STEMINISTS General Member

- Assisted in organizing STEM outreach events for younger students, including activity setup and registration.
- Built small hands-on projects such as LED circuits, simple robots, or sensor-based devices.
- Used online tools like Tinkercad, Scratch, and Arduino simulators to practice problem solving.
- Collaborated with peers to debug code and test small programs

Technical Skills

Languages and Frameworks: Java, Python, SQL

Developer Tools: MS Office, Adobe Acrobat, Adobe Photoshop, AutoCAD, MATLAB
